CLAIMS

1. A hair treatment composition comprising a silicone
pressure sensitive adhesive emulsion in which the
5 emulsion comprises a disperse organic solvent phase in a
continuous water phase.
2. A hair treatment composition according to claim 1, in
which the silicone pressure sensitive emulsion prior to
10 addition to the composition comprises a disperse organic
solvent phase in a continuous water phase.
3. A hair treatment composition according to claim 1 or
claim 2 in which the emulsion further comprises a
15 surfactant.
4. A hair treatment composition according to any preceding
claim in which the organic solvent is a hydrocarbon.
- 20 5. A hair treatment composition according to claim 4 in
which the solvent is isododecane.
6. A hair treatment composition according to any preceding
claim which is a leave on product.
- 25 7. A hair treatment composition according to any preceding
claim which further comprises a propellant.
8. A hair treatment composition according to any preceding
30 claim in which the propellant is a hydrocarbon gas.

- 40 -

9. A hair treatment composition according to any preceding claim further comprising a hair conditioning agent.

10. A composition according to any preceding claim, in which
5 the silicone pressure sensitive adhesive comprises 20 to 80 % by weight of the silicone pressure sensitive adhesive emulsion.

11. A method for styling hair which comprises contacting the
10 hair with a composition in accordance with any preceding claim.

12. A hair treatment composition obtainable by adding a
silicone pressure sensitive adhesive emulsion comprising
15 a silicone pressure sensitive adhesive and an organic solvent phase in a continuous water phase to a base composition.

13. The use of the hair treatment composition according to
20 any one of claims 1 to 9 to impart hair styling without stickiness.
